Provider Types Affected

This article is for clinical diagnostic laboratories billing Medicare Carriers or Part A/B Medicare Administrative Contractors (MACs) for laboratory tests.

Provider Action Needed

STOP – Impact to You

If you do not have a valid, current, Clinical Laboratory Improvement Amendments of 1998 (CLIA) certificate and submit a claim to your Medicare Carrier or A/B MAC for a Current Procedural Terminology (CPT) code that is considered to be a laboratory test requiring a CLIA certificate, your Medicare payment may be impacted.

CAUTION – What You Need to Know

For dates of service on or after April 1, 2011, claims that use code G0431QW will be denied. Effective January 1, 2011, the code G0430 has been deleted and replaced with code G0434. Therefore, the code G0434QW replaces G0430QW in the list attached to CR7266.

GO – What You Need to Do

Make sure that your billing staffs are aware of these CLIA-related changes for 2011 and that you remain current with certification requirements.

Background

CLIA requires that for each test it performs, a laboratory facility must be appropriately certified. The CPT codes that the Centers for Medicare & Medicaid Services (CMS) consider to be laboratory tests under CLIA (and, therefore, requiring certification) change each year. CR7266, from which this article is taken, informs carriers and MACs about the latest new CPT codes that are subject to CLIA edits

Listed below are the latest tests approved by the Food and Drug Administration as waived tests under CLIA. The tests are valid as soon as they are approved. The CPT codes for the following new tests **MUST have the modifier QW** to be recognized as a waived test. Note, however, that the tests mentioned on the first page of the list attached to CR7266 (i.e., CPT codes 81002, 81025, 82270, 82272, 82962, 83026, 84830, 85013, and 85651) do not require a QW modifier to be recognized as a waived test.
